

THE COMPANY

CHRISTAN DESIGN is a full service agency for nano brick design and manufacturing. Led by our renowned Chief Designer and founder Christopher Tan, we have the expertise to professionally design custom nano brick sets according to your needs and the manufacturing partners with the capacity to mass manufacture them.

We take your vision and turn them into awesome nano brick sets complete with the bricks (obviously), instruction sheet, custom stickers and packed into polybags or boxes customized with your custom artwork. No more headaches on finding the best designer, sourcing reliable high quality manufacturers and co-ordinating all the behind the scenes work. We do it all for you with unparalleled dedication.

Our company serves clients worldwide. Get in touch with us now to find out how we can make your nano-dreams a reality!

- Exhibition in Kinokuniya @ KLCC, Malaysia.

2013

- nanoblock Award 2013-2014 : Won an Award of Excellence.

IN THE MEDIA

FREQUENTLY ASKED QUESTIONS

What are nano bricks?

Nano bricks are tiny building blocks, like Lego, but a lot smaller. The smallest block is only 4mm x 4mm x 5mm. This allows us to create highly detailed designs in a small size. There are many brands of nano bricks in the market, all based on the same types of brick sizes. The most well known is nanoblock.

How do we start?

Just drop us an email with information on what you want us to design (do include some photos), expected order quantity and deadline for delivery. We will evaluate those information to determine feasibility and provide you with an estimated cost. After that, if you decide to proceed, we will come out with the actual design for your review, and when confirmed, we can give you an accurate cost based on that final design.

What is the minimum order quantity?

The minimum order quantity is 1000 pieces. If you need less than that, we would have to evaluate on a case to case basis, and the cost would be significantly higher, as we are manufacturing in a factory production line.

What can we customise?

When we manufacture for you, each nano brick set comes with the bricks and printed instruction sheet packed in either polybag or box packaging. The artwork on the cover of the polybag packaging or the sticker on top of the box packaging can be fully customised by client to show company logo, etc. If your nano brick set needs to include a sticker of your logo, we can do that too!

How long does it take?

Usually, the manufacturing lead time is about 60 days. This can vary depending on how big your order is and the capacity of the factory at any given time.

How much will it cost?

We will only be able to give you a cost estimate after we know what it is that you want us to design and the order quantity.

Why choose us?

We have a close working relationship with large, well-established nano brick manufacturers who are known for their outstanding quality and reliability. Thanks to the close ties we have with them, we are able to accept orders at fairly low quantities (for a mass production factory) while maintaining a reasonably low price for a custom product.

In addition, when you select us to design your nano brick product, it is not just another nano brick set, it is a DESIGNER product by a renowned artist.

Can we collaborate on marketing?

Definitely! This is something that only we can offer! We have a large following on our social media channels with fans from all around the world. To date, we have over 53,000 fans on our Facebook page alone! We are also on Instagram, Twitter, Weibo, YouTube, Pinterest, Tumblr, etc. This allows us to showcase your campaign directly to nano brick fans worldwide. In addition, Chris can be engaged to attend launch events, do live broadcast from the event, handle media interviews and such.

Do you have samples of previous projects?

Sure, here are just some examples of past projects we have done for corporate clients.
